PERSONAL PROFILE

Analytical MSc Business Analytics graduate from University College Cork with a BSc in Computer Science and experience working with data, systems, and business processes. Skilled in SQL, Python, Power BI, and Excel to analyse data, build dashboards, and support data-driven decision making. Experienced in translating business requirements into structured solutions and improving workflows through data insights. Detail-oriented and curious, with a strong interest in using data and technology to solve business problems and support organisational decision-making.

EDUCATION

MSc. Business Analytics | University College Cork | 2024 – 2025 (2:1)

- Business Forecasting & Econometrics
- Data Management & Information Systems
- Design Thinking for Business Analytics
- Enterprise Business Processes & Systems
- Predictive Analytics & Prescriptive Analytics
- AI & LLM Engineering

Final Year Project - AI-Enabled Prescription Fraud Detection Platform (PresciSafe)

- Developed a real-time AI-driven fraud detection platform using synthetic healthcare datasets and ML models (Isolation Forest, Logistic Regression).
- Detected prescription anomalies (doctor shopping, overuse) using Python, SQL, and unsupervised learning techniques.
- Built interactive dashboards and alerts in Power BI and Streamlit for pharmacists and regulators to support decision-making.
- Designed and deployed a full-stack data pipeline for integration, cleansing, feature engineering, and fraud scoring (React.js + FastAPI).

BSc. Computer Science | University of Calicut | 2020 - 2023 (1:1)

- Programming Fundamentals (Java, C++, PHP)
- Database Systems & SQL
- Computer Networks & Linux Shell Scripting
- Statistics & Applied Mathematics
- Software Engineering & System Design
- Data Structures & Algorithms

Final Year Project (Undergraduate): 'Exam Hall Seating Arrangement System'

Developed a MySQL-based system to automate seating allocation for large student groups. Technologies used: PHP, MySQL.

WORK EXPERIENCE

Business Analyst & Partner (Remote)| Concours Fashions, Kerala, India (January 2024 – June 2025)

Responsibilities:

- Supported business operations and inventory decisions through sales data analysis using Excel and SQL.
- Developed dashboards for monthly performance insights and stock planning.
- Advised on selection and implementation of a POS and inventory management system, improving transaction accuracy.
- Contributed to marketing and engagement strategies through Instagram analytics and content planning.
- Collaborated remotely with on-site team on vendor coordination, pricing updates, and seasonal product planning.
- Applied academic data tools in real-time retail operations, bridging theory with commercial insight.

Jr. ERP Systems Engineer | Coral Business Solutions, Kerala, India (July 2023 – December 2023)

Responsibilities:

- Delivered ERP system support and troubleshooting, improving overall application performance and efficiency.
- Analyzed business requirements and translated them into ERP functional specifications, resolving 50+ technical issues and reducing downtime by 20%.
- Developed SQL-based data management systems, optimizing data storage and retrieval for business insights.
- Designed and deployed Power BI dashboards for business performance tracking, helping management identify process inefficiencies and cost-saving opportunities.
- Collaborated in Agile sprints with development and business teams to enhance ERP functionality, data integration, and end-user experience

SKILLS

Data & Technical Skills

SQL • Python • Power BI • Excel • Tableau • Data Analysis • Data Cleaning • Data Visualisation • Dashboard Development • Reporting

Business & Analytical Skills

Requirement Gathering • Process Mapping • Workflow Analysis • KPI Tracking • Root Cause Analysis • Problem Solving • Data Interpretation

Tools & Systems

JIRA • MS Office Suite • Database Systems • ERP System Support

Professional Skills

Stakeholder Communication • Presentation Skills • Organisation • Attention to Detail • Critical Thinking • Team Collaboration

ACHIEVEMENTS

- Data Analytics & Visualization (Certified)
- Lean Six Sigma (Certified) – Coursera
- NSS Volunteer: Led community initiatives impacting 200+ participants, demonstrating leadership and teamwork.
- National Cadet Corps (NCC): Built discipline and leadership through participation in 5+ training camps and community events.
