PROFESSIONAL SUMMARY

Business Analytics graduate with a Computer Science background and experience in ERP software development, SQL analysis, Power BI, and business process improvement. Skilled in data analytics, reporting, forecasting, and transforming data into actionable business insights.

PROFESSIONAL EXPERIENCE

Junior Software Engineer

Coral Business Solutions | Aluva, Kerala, India (Jul 2023 – Jul 2024)

- Developed and enhanced ERP application features using Java, SQL, and HTML technologies.
- Analysed business requirements and translated them into functional system enhancements.
- Designed SQL queries for data extraction, validation, and business reporting.
- Collaborated with stakeholders and developers to deliver ERP solutions aligned with business needs.
- Participated in software testing, debugging, deployment, and user acceptance testing activities.
- Investigated and resolved technical and functional defects through root cause analysis.
- Supported the development of reporting solutions and process improvements across ERP modules.
- Produced technical documentation and implementation support materials.

TECHNICAL SKILLS

- **Programming & Data:** SQL, Python, Java, Excel (Advanced), Linux Shell Scripting, HTML
- **Analytics & BI:** Power BI, Tableau, Data Analysis, Data Visualization, Dashboard Development, Business Intelligence, Predictive Analytics
- **Business Analysis:** Requirements Gathering, KPI Reporting, Process Mapping, Root Cause Analysis, Stakeholder Communication, Business Process Improvement
- **AI & Machine Learning:** Machine Learning, Predictive Modelling, Scikit-Learn, Generative AI Tools
- **Tools:** JIRA, ERP Systems, Microsoft Office Suite, Github

PROJECTS

Drug Launch Performance Analytics Pipeline

Python | Tableau | Pandas | Scikit-Learn

- Developed an end-to-end pharmaceutical analytics solution to analyze physician adoption, prescription growth, and territory performance.
- Built forecasting models and physician segmentation workflows to identify growth opportunities and support commercial decision-making.
- Designed executive dashboards and KPI reporting solutions for sales and market performance monitoring.

PresciSafe – AI-Powered Prescription Fraud Detection Platform

Python | SQL | Power BI | Streamlit | Machine Learning

- Developed an AI-powered healthcare fraud detection platform to identify prescription misuse and suspicious prescribing patterns.
- Applied anomaly detection and machine learning techniques to generate fraud-risk scores and support proactive intervention.
- Built interactive dashboards and real-time alerts for healthcare stakeholders.

Real Exchange Rate Forecasting & PPP Analysis

Python | ARIMA | Econometrics | Forecasting

- Developed a time-series forecasting model to predict EUR/INR exchange rate movements using macroeconomic datasets.
- Performed econometric analysis, stationarity testing, and ARIMA modeling using the Box-Jenkins framework.
- Delivered forecasts with a MAPE of 3.23% and actionable economic insights.

EDUCATION

Master of Science in Business Analytics • University College Cork • Cork, Ireland • Sep 2024 – Oct 2025
Second Class Honors (2:1)

Bachelor of Science in Computer Science • University of Calicut • Kerala, India • Jun 2020 – Apr 2023
First Class Honors (1:1)

CERTIFICATIONS

- Deloitte Australia – Technology Job Simulation | Forage | 2026
- British Airways – Data Science Job Simulation | Forage | 2026
- Data Analytics and Visualisation | KVJ Analytics | 2025
- Lean Six Sigma Certification | Coursera | 2025
